COURSEWORK

UNDERGRADUATE
Data Structure
Operating Systems
Artificial Intelligence
Algorithms
Complexity
Computer Graphics
Image processing
Android

SKILLS

PROGRAMMING
Over 7 projects:
• Electron.JS • Vanilla Javascript • HTML
• Python • CSS • MongoDB • MySQL
• Socket programming • Leaflet.JS
• NodeJS • Bootstrap • Figma
• Map APIs [Mapbox - Google maps]
• Git • Caching • API
Over 1 project:
• C++ • PHP • Dart • Flutter
• ExpressJS • Material UI
• Unity • Firebase • React JS • Sass
• Tailwindcss • Ant design
Familiar:
• React Native • Vue JS

EXPERIENCE

RESEARCH AND DEVELOPMENT CENTER "EGYPTIAN AIR DEFENSE MILITARY COMMANDS" | SOFTWARE ENGINEER
May 2022 - May 2023 | Cairo
- Developed and maintained over 7 desktop applications using Electron.
- Leveraged Map APIs to integrate location-based features into the applications, such as geolocation and map visualization.
- Implemented both relational and non-relational databases, including MySQL and MongoDB, to manage application data and facilitate efficient data storage and retrieval.

PROJECTS

APPLICATION VIEW | REACTJS-TYPESCRIPT-TAILWIND-ANT DESING-FIGMA
Sept 2023 – Sept 2023
Developed a dynamic form interface using React, TypeScript, Tailwind CSS, and Ant Design. Implemented interactive and responsive components to enhance user experience. The application includes form validation to ensure data integrity. Deployed the project on Vercel to optimize performance.

A.D.M (AIR DEFENSE MILITARY) | ELECTRON.JS-TYPESCRIPT-MAP API - DATABASE - SOCKET PROGRAMMING - NODEJS - BOOTSTRAP
2022 – 2023
Built eight Electron desktop apps with map APIs, MySQL/Mongo databases, socket programming for real-time communication, and maintained large legacy JavaScript codebases. Delivered high-quality products meeting clients' specifications and applauded for their excellent performance and functionality

PORTFOLIO | REACTJS - SASS - ANIMATION
May 2023 - June 2023
Created a React and Sass portfolio website with dynamic UI, reusable CSS styles, animations, and transitions. Leveraged React's component-based architecture and state management to ensure a responsive interface. Wrote clean, modular CSS with Sass. Optimized UX with animations and transitions, and ensured accessibility.

PART OF SPEECH | REACTJS - EXPRESSJS - SASS - DARKLIGHTMODE
July 2023 - July 2023
Developed an interactive web activity using React.js and Node.js with Express.js, including features such as fetching random words and calculating progress. added features such as quiz termination, dark and light mode, animations, and used TypeScript and Sass. Wrote clean, reusable code with DRY principle and readability.

LANGUAGES

English — VERY GOOD
ARABIC — MOTHER TONGUE

SOFT SKILLS

- Rapidity typing on keyboard. (114WPM+)
- Quicker learner.
- Has leading skills.
- Team communication.
